

Synopsis **Broadband in Europe**

Asia and Europe are primary markets for emerging broadband services, residential gateways, and home networking solutions. This report analyzes the European landscape, providing a country-by-country overview of drivers, inhibitors, the major service providers, and the pilots currently underway. It provides detail of developments in broadband deployment, digital television services, home networks, and mobile telephony.

Source: Company financial reports

Publish Date: Dec 02

"Service providers will prove to be the critical channel in deploying home networks and their associated services in Western Europe," said Kurt Scherf, vice president of research for Parks Associates. "It is therefore critical to have a thorough understanding of the service provider landscape in this emerging market."
